

THREADED BSPT OUTLET

Threaded mechanical tees may be used for any tee connection where a threaded outlet is needed. Some sizes may be converted into a cross when necessary**.

Material specifications

Housing: ductile iron conform to ASTM A536 GR65-45-12

Coating :

- Hot dip galvanized
- Red paint coating RAL 3000, EPD Epoxy coating

Rubber gaskets: EPDM gaskets dispose of the international certifications and have undergone the aging test at 110°C/230°F during a period of 45 days/1080 hours and the frozen test at -40°C/-40°F during a period of 4 days/96 hours.

Bolts and nuts: see technical datasheet bolts and nuts.

Working pressure

300 PSI/2068 kPa

General notes:

- Pressure ratings listed are CWP (cold working pressure) or MWP (maximum working pressure) at a maximum service temperature of 50°C. This rating may occasionally differ from maximum working pressure listed and/or approved by UL and/or FM, as testing conditions and test pipes can differ. For more information, please contact info@pipinglogistics.eu.
- Maximum working pressure listed is the total of internal and external pressures based on standard weight (ANSI) steel pipe and standard roll or cut groove in accordance with Profit specifications. For more information, please contact info@pipinglogistics.eu.
- For one time field test only, the maximum joint working pressure may be increased by 150% the figure shown.
- Warning: Piping systems must always be depressurized and drained before attempting disassembly and/or removal of any components.
- Profit reserves the right to change specifications, designs and/or standard equipment without notice and without incurring in any obligations.
- Profit red coated products are intended for piping with indoor application (EN 12944-2 corrosivity category C1 & C2). For outdoor installations near the sea (corrosivity category C3) we advise the use of our hot dip galvanized couplings and fittings. For application in corrosivity category C4 (higher salinity climate) or higher, please contact info@pipinglogistics.eu.
- We advise to always store our products in closed and dry environments.
- **Mechanical cross not FM and UL certified.

LABEL EXAMPLE

Mechanical tee	
GMD (Threaded)	
2-11/4	3-11/4
2-11/2	4-11/4
21/2-11/4	6-11/4
Hole cut dimension 46(+1mm)	

- * Please note that the **correct hole cut dimension** is mentioned:
- on the label which is attached to the product itself
 - on the document called 'Hole cut dimensions', which is added to each delivery from our warehouse Piping Logistics, Belgium. This document is attached to the outside of the first box in a plastic pouch with reference 'Documents enclosed'

Mechanical cross** conversion				
Inch	Main pipe diameter		Maximum outlet mechanical cross	
	DN mm	O.D. mm	DN mm	Thread size T
2½	65	76,1	32	1¼"
3	80	88,9	40	1½"
4	100	114,3	50	2"
6	150	168,3	80	3"
8	200	219,1	100	4"

General notes:

- Pressure ratings listed are CWP (cold working pressure) or MWP (maximum working pressure) within the service temperature range of the gasket used in the coupling. This rating may occasionally differ from maximum working pressure listed and/or approved by UL and/or FM, as testing conditions and test pipes can differ. For more information, please contact info@pipinglogistics.eu.
- Maximum working pressure listed is the total of internal and external pressures based on standard weight (ANSI) steel pipe and standard roll or cut groove in accordance with Profit specifications. For more information, please contact info@pipinglogistics.eu.
- For one time field test only, the maximum joint working pressure may be increased by 150% the figure shown.
- Warning: Piping systems must always be depressurized and drained before attempting disassembly and/or removal of any components.
- Profit reserves the right to change specifications, designs and/or standard equipment without notice and without incurring in any obligations.
- Profit red coated products are intended for piping with indoor application (EN 12944-2 corrosivity category C1 & C2). For outdoor installations near the sea (corrosivity category C3) we advise the use of our hot dip galvanized couplings and fittings. For application in corrosivity category C4 (higher salinity climate) or higher, please contact info@pipinglogistics.eu.
- We advise to always store our products in closed and dry environments.
- **Mechanical cross not FM and UL certified.
